

Adi Hodžić

Senior Product Designer | B2B SaaS, Fintech and AI Workflows

Mostar, Bosnia and Herzegovina | +387 66 252 801 | adi@adihodzic.com

Portfolio: adihodzic.com | linkedin.com/in/adidoes

CET/CEST | Available full-time via EOR or B2B contract | Open to relocation

Profile

Senior Product Designer with 10+ years across digital products and web, including four years at ROKOLabs working with product teams. I specialise in financial workflows, complex B2B SaaS and AI-assisted experiences. My work combines user research, interface design and design systems with hands-on implementation review. I build coded prototypes to explore interactions with stakeholders and give developers a working reference.

Professional Experience

Senior Product Designer | ROKOLabs | 2022 - Present

Remote | Lead designer on client product engagements

- **Wealth-management SaaS:** Led design for portfolio and tax analysis, recommendations, proposal creation and adviser dashboards. The redesigned proposal workflow reduced completion time from 40 to 9 minutes, a 78% reduction.
- Used recurring adviser feedback to replace a central checklist experience with contextual next steps, helping users continue work from the relevant part of the platform.
- **SimpliGov:** Designed AI document workflows from upload and extraction through human review, correction and workflow generation, including API configuration and testing.
- **IAEA:** Designed environmental sample management, data grids, plotting tools and SEM analysis interfaces for inspecting and comparing scientific data.
- **FracStream:** Designed real-time operational dashboards and controls for frac-fluid characterisation and well planning, including interfaces for mobile field use.
- Built and maintained a shared design system with 40+ components in Figma and Storybook, used across 15 projects, with documented patterns and accessibility guidance.
- Conducted user and stakeholder interviews and usability tests. Worked with product managers and engineers from discovery through implementation review and QA.
- Used Claude for research synthesis and Claude Code for interactive prototypes, reviewing outputs against product requirements and design-system rules.

Product and E-commerce Lead | AB1GK | 2019 - Present

Remote | Ongoing product engagement with a UK e-commerce brand

- Lead UX/UI, product pages, checkout and payment flows, responsive design and conversion optimisation. During this work, overall conversion increased from 1.7% to 3.2%, a gain of 1.5 percentage points.
- Designed and built the brand identity and e-commerce experience, working directly with the founder. Implemented WooCommerce, HTML/CSS, payment integrations and platform improvements.

Professional Experience Continued

Product Designer | Novagrupa | 2015 - 2022

Mostar, Bosnia and Herzegovina

- Delivered 10+ digital products and platforms across multiple industries, from discovery and requirements through wireframes, interactive prototypes, UI and developer handoff.
- Worked with clients and developers to translate business goals and user needs into navigation, responsive interfaces and implementation decisions.

Web Designer / Developer | BIZmedia | 2007 - 2015

Mostar, Bosnia and Herzegovina

- Designed and built websites, apps and digital platforms for media, e-commerce and promotional clients using HTML, CSS and content management systems.
- Supported projects from research and information architecture through interface design, launch and ongoing improvements.

Core Skills

Product design: UX strategy, user research, usability testing, information architecture, interaction design, responsive UI, data visualisation and design QA.

Design systems: Figma Auto Layout, components, variants, variables and tokens; Storybook; accessibility and WCAG considerations.

Prototyping and collaboration: Claude Code, Cursor, React/TypeScript prototypes, HTML/CSS, JavaScript, API workflow design, FigJam, Jira and GitHub.

Selected Coded Prototypes

Design System Guardian

Designed and built a React/TypeScript prototype with Claude Code to check designs against design-system rules, flag inconsistencies and suggest fixes for review.

designsystemguardian.vercel.app

Tripsitter

Designed and built a React/TypeScript travel-planning prototype with Claude Code, turning trip preferences into a day-by-day itinerary.
